

Copper-free, palladium-based alloy for metal-ceramic restorations; bio certificate.

- copper-free – also suitable for sensitive patients
- bio certificate – safety for dentist and patient
- alloyed with gold and silver – very good melting, flow and soldering properties
- light-coloured oxide – reliable colouration of ceramic materials
- low density and low price per gram – cost-saving and low material price per unit
- suitable for veneering with plastics and conventional ceramics – no additional investments necessary

Samenstelling legering:

| <b>Composition</b> (x = <1%): |           |
|-------------------------------|-----------|
| <b>BegoPal® 300</b>           |           |
|                               | % by mass |
| Gold (Au)                     | 6         |
| Platinum (Pt)                 | 0         |
| Palladium (Pd)                | 75.4      |
| Silver (Ag)                   | 6.2       |
| Copper (Cu)                   | 0         |
| Tin (Sn)                      | 0         |
| Zinc (Zn)                     | 0         |
| Indium (In)                   | 6.3       |
| Other elements (<1%)          | Ru Ga 6,0 |
